REST API - RESERVES

1. Model Espais

a) Action List

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/espais

• Filters: ?codi=A&descripcio=Espai%

• Method: GET

• Headers: X_USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

• Return: Devuelve los espacios que puede ver el usuario. Todos, si es usuario admin.

• JSON:

```
[ {"id": "1", "codi": "A", "descripcio": "Espai A"}, 
{"id": "2", "codi": "B", "descripcio": "Espai B"} ]
```

b) Action View

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/espais/{id}

• Method: GET

• Headers: X_USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

• Return: Devuelve el espacio correspondiente al id indicado en la URL. Si el espacio no existe o el usuario no lo puede ver, devuelve error 404.

• JSON:

```
{"id": "1", "codi": "A", "descripcio": "Espai A"}
```

• Errors:

{"codError": 404, "descError": "VIEW: No existeix o no es pot accedir a l'espai amb id=100"}

c) Action Create

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/espais/

Method: POST

• Headers: Content-Type: application/x-www-form-urlencoded

X_USERNAME: username

X_PASSWORD: password_encriptat

Data: codi=XX&descripcio=Descripció+XX

\Rightarrow Response

• Return: Devuelve id del espacio creado. Si el usuario no es admin, devuelve error 403.

• JSON:

{"id": "11"}

• Errors:

{"codError": 403, "descError": "CREATE: L'usuari no té permís per crear espais"}

d) Action Update

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/espais/{id}

• Method: PUT

• Headers: Content-Type: application/json

X_USERNAME: username

X_PASSWORD: password_encriptat

Data: {descripcio: "Espai XX"}

\Rightarrow Response

• Return: Devuelve id del espacio actualizado. Si el usuario no es admin, devuelve error 403. Si no existe el espacio, devuelve error 404.

• JSON:

{"id": "11"}

• Errors:

{"codError": 403, "descError: "UPDATE: L'usuari no té permís per actualitzar espais"}

{"codError": 404, "descError": "UPDATE: No existeix l'espai amb id=100"}

e) Action Delete

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/espais/{id}

Method: DELETE

• Headers: X USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

• Return: Devuelve id del espacio borrado. Si el usuario no es admin, devuelve error 403. Si no existe el espacio, devuelve error 404.

• JSON:

{"id": "11"}

• Errors:

{"codError": 403, "descError: "DELETE: L'usuari no té permís per esborrar espais"}

{"codError": 404, "descError": "DELETE: No existeix l'espai amb id=100"}

2. Model Usuaris

a) Action List

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/usuaris

• Filters:

?nom_usuari=user%&nom=nom%&cognoms=cognoms%&es_admin=1

Method: GET

• Headers: X_USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

• Return: Devuelve los usuarios que puede ver el usuario. Todos, si es usuario admin. Si no es admin, devuelve el propio usuario.

• JSON:

```
[ {"id": "1", "nom_usuari": "user", "contrasenya": "password", "nom": "nom", "cognoms": "cognoms", "es_admin": "1"},
    {"id": "2", "nom_usuari": "user2", "contrasenya": "password2", "nom": "nom2", "cognoms": "cognoms2", "es_admin": "0"}]
```

b) Action View

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/usuaris/{id}

Method: GET

• Headers: X_USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

• Return: Devuelve el usuario correspondiente al id indicado en la URL. Si el usuario no existe o no lo puede ver, devuelve error 404.

JSON:

```
{"id": "2", "nom_usuari": "user2", "contrasenya": "password2", "nom": "nom2", "cognoms": "cognoms2", "es_admin": "0"}
```

• Errors:

{"codError": 404, "descError": "VIEW: No existeix o no es pot accedir a l'usuari amb id=100"}

c) Action Create

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/usuaris/

Method: POST

Headers: Content-Type: application/x-www-form-urlencoded

X_USERNAME: username

X_PASSWORD: password_encriptat

• Data:

 $nom_usuari=username\&contrasenya=password_ecriptat\&nom=nom\&c\\ognoms=cognom1+cognom2\&es_admin=0_o_1$

\Rightarrow Response

- Return: Devuelve id del usuario creado. Si el usuario conectado no es admin, devuelve error 403.
- JSON:

```
{"id": "11"}
```

• Errors:

{"codError": 403, "descError": "CREATE: L'usuari no té permís per crear usuaris"}

d) Action Update

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/usuaris/{id}

Method: PUT

• Headers: Content-Type: application/json

X_USERNAME: username

X_PASSWORD: password_encriptat

Data: {nom: "nou_nom", es_admin: "1"}

\Rightarrow Response

• Return: Devuelve id del usuario actualizado. Si el usuario conectado no es admin, devuelve error 403. Si no existe el usuario a actualizar, devuelve error 404.

• JSON:

```
{"id": "11"}
```

• Errors:

```
{"codError": 403, "descError: "UPDATE: L'usuari no té permís per actualitzar usuaris"}
```

{"codError": 404, "descError": "UPDATE: No existeix l'usuari amb id=100"}

e) Action Delete

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/usuaris/{id}

• Method: DELETE

• Headers: X_USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

• Return: Devuelve id del usuario borrado. Si el usuario conectado no es admin, devuelve error 403. Si no existe el usuario a borrar, devuelve error 404.

JSON:

```
{"id": "11"}
```

• Errors:

```
{"codError": 403, "descError: "DELETE: L'usuari no té permís per esborrar usuaris"}
```

{"codError": 404, "descError": "DELETE: No existeix l'usuari amb id=100"}

3. Model Reserves

f) Action List

\Rightarrow Request

• URL: <a href="http://localhost/yii/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserves/api/reserve

• Filters: ?inici=aaaammddhh&fi=aaaammddhh&espai=1&usuari=1

Method: GET

• Headers: X USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

 Return: Devuelve las reservas que puede ver el usuario conectado. Si el usuario conectado es admin, puede ver los datos del usuario de la reserva. Si no, se muestra null em "usuari id".

JSON:

```
[ {"id": "2","data_hora": "2014-05-13 11:00:00",
    "espai_id": {"id": "2","codi": "B","descripcio": "Espai B"},
    "usuari_id": {"id": "2","nom_usuari": "user2","contrasenya":
    "password2","nom": "nom2","cognoms": "cognoms2","es_admin": "0"},
    "data_modif": "2014-05-13 22:22:26"},
    {"id": "3", "data_hora": "2014-06-13 12:00:00",
    "espai_id": {"id": "3", "codi": "C", "descripcio": "Espai C"},
    "usuari_id": {"id": "2", "nom_usuari": "user2", "contrasenya": "password2",
    "nom": "nom2", "cognoms": "cognoms2", "es_admin": "0"},
    "data_modif": "2014-05-17 17:55:52"}]
```

g) Action View

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/reserves/fid

• Method: GET

• Headers: X_USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

- Return: Devuelve la reserva correspondiente al id indicado en la URL. Si la reserva no existe, devuelve error 404. Si el usuario conectado es admin, puede ver lo datos del usuario de la reserva. Si no, se muestra null en "usuari id".
- JSON:

```
{"id": "2", "data_hora": "2014-05-13 11:00:00",
    "espai_id": {"id": "2", "codi": "B", "descripcio": "Espai B"},
    "usuari_id": {"id": "2","nom_usuari": "user2","contrasenya": "password2",
    "nom": "nom2", "cognoms": "cognoms2", "es_admin": "0"},
    "data modif": "2014-05-13 22:22:26"}
```

• Errors:

{"codError": 404, "descError": "VIEW: No existeix la reserva amb id=100"}

h) Action Create

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/reserves/

Method: POST

• Headers: Content-Type: application/x-www-form-urlencoded

X USERNAME: username

X_PASSWORD: password_encriptat

Data: data_hora=aaaammddhh&espai_id=2&usuari_id=2

\Rightarrow Response

- **Return:** Devuelve id de la reserva creada. Si el usuario conectado no es admin, se guarda el propio usario.
- JSON:

```
{"id": "11"}
```

i) Action Update

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/reserves/fid

Method: PUT

• Headers: Content-Type: application/json

X_USERNAME: username

X_PASSWORD: password_encriptat

Data: {data_hora: "aaaammddhh", espai_id: "2", usuari_id: "2"}

\Rightarrow Response

• **Return:** Devuelve id de la reserva actualizado. Si el usuario conectado no es admin, devuelve error 403. Si no existe la reserva a actualizar, devuelve error 404.

• JSON:

{"id": "11"}

• Errors:

{"codError": 403, "descError: "UPDATE: L'usuari no té permís per actualitzar reserves"}

{"codError": 404, "descError": "UPDATE: No existeix la reserva amb id=100"}

j) Action Delete

\Rightarrow Request

• URL: http://localhost/yii/reserves/api/reserves/fid

Method: DELETE

• Headers: X USERNAME: username

X_PASSWORD: password_encriptat

\Rightarrow Response

- Return: Devuelve id de la reserva borrada. Si el usuario conectado no es admin, devuelve error 403. Si no existe la reserva a borrar, devuelve error 404.
- JSON:

```
{"id": "11"}
```

• Errors:

```
{"codError": 403, "descError: "DELETE: L'usuari no té permís per esborrar reserves"}
{"codError": 404, "descError": "DELETE: No existeix la reserva amb id=100"}
```
